WATCHCOM VULNERABILITY MANAGEMENT

A systematic approach to manage your vulnerabilities have never been easier. Our solution with its proven track record helps clients save time and effort every day. We are proud to present the latest version of our solution, now provided as a complete service suite.

BEST-OF-BREED TECHNOLOGY – JUST TO BE SAFE

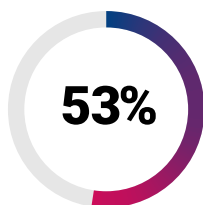

With best-of-breed technology and specially trained Vulnerability Analysts, we survey your infrastructure, verify the results and assist the customer to understand the results. We survey your infrastructure on a fixed schedule so it is easy for you to compare results over time with the trending functionality in the solution. Whether you need Vulnerability Management for compliance or as an external expert opinion, this solution provides excellent documentation of your efforts for managing vulnerabilities.

A systematic Vulnerability Program will help you succeed to achieve compliance with various laws, regulations and standards e.g. GDPR, ISO-27001 and more.

As monitoring experts, we know that a source like Watchcom Vulnerability Management feeding into your SIEM solution is an essential piece of security information. The vulnerability information supports faster incident response. The analyst's risk rating will be more accurate, and reduces the risk of false-positives. Our solution integrates with all major SIEM vendors on the market.

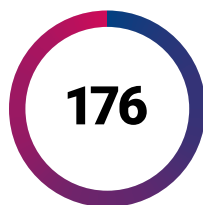

Built on Tenable Nessus and Tenable Security Center, the market leading Vulnerability Management technology is available for you. Operated, maintained and hosted in the Nordics from our Security Operation Center. A pure as-a-Service model based upon a monthly subscription allow you the flexibility you need when your infrastructure changes.

DID YOU KNOW?

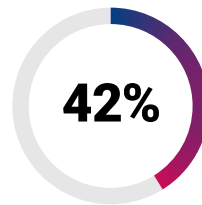

of external attacks are carried out by exploiting software vulnerabilities

Source: Forrester VM Market Overview

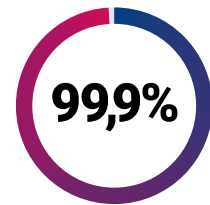

is the average number of days it takes to find a vulnerability

Source: The NopSec 2015 State of Vulnerability Risk Management

says it is difficult to prioritize which vulnerabilities are the most important

Source: Forrester Technology Adoption Profile, 2015

of all exploited vulnerabilities had been compromised more than a year after the associated CVE was published

Source: Verizon 2015 Data Breach Investigations Report

Our solution will help you get control and improve your vulnerability posture to ensure that you can mitigate exposed vulnerabilities, understand what vulnerabilities to prioritize and detect new vulnerabilities faster with weekly scans.

THE WATCHCOM VULNERABILITY MANAGEMENT FAMILY

- **Perimeter Scanning** – Detects and gives you a valuable tool to mitigate vulnerabilities in your systems exposed to the internet
- **Internal Scanning** – Detects and gives you a valuable tool to mitigate vulnerabilities in your internal network. We offer both traditional centralized scanner methodology our agent-based scanners to fit your needs.
- **Scanning of Cloud Deployments** – Specially designed components used to detect and mitigate vulnerabilities in systems in your cloud-based deployments.

SERVICE LEVELS

We offer flexible service levels to fit your organization and requirements.

	Standard	Advanced	Professional	Ultimate
Market leading scanning technology	✓	✓	✓	✓
Managed in the Nordics	✓	✓	✓	✓
Scanning once a week*	✓	✓	✓	✓
Daily manual alerts of newly discovered critical vulnerabilities from the SOC		✓	✓	✓
Executive summary from Senior Analysts			✓	✓
Access to Vulnerability Analysts advisory			✓	✓
Manual in-depth penetration testing				✓

* Custom Scan Schedule is available for the «Ultimate» and «Professional» service levels.
